Projects

RestaurantDepo   **November 2023**
Web Application | JavaScript (JS), React, Django, Postman, CSS, Tailwind CSS
-Developed a robust restaurant management web application using JavaScript (JS) as the primary scripting language.
-Implemented a dynamic and responsive user interface utilizing the React library for enhanced interactivity and a seamless user experience.
-Utilized Django, a high-level Python web framework, to build a powerful and scalable back-end system, ensuring efficient data processing and management.
-Conducted thorough API testing and validation with Postman, ensuring the reliability and security of data interactions.
-Styled the application using CSS for a clean and professional appearance, with additional enhancements made using the Tailwind CSS framework for rapid development and a modern design approach.
-Designed and implemented a user-friendly interface enabling easy addition, editing, and organization of restaurant entries.
-Integrated a maintenance reminder system to automate and streamline routine tasks, enhancing overall operational efficiency.

Garage   **September 2023**
Web Application | JavaScript, React, MongoDB, Python
- Developed "Garage," an all-in-one car management app designed for car enthusiasts to track and catalog their car collections effortlessly.
- Created a user-friendly interface with intuitive features for adding, editing, and organizing car entries, including essential details such as make, model, year, and images.
- Implemented a robust maintenance reminder system, allowing users to schedule and receive notifications for routine car maintenance tasks, ensuring the longevity of their vehicles.

Movistar   **August 2023**
Web Application | JavaScript, React, MongoDB
- Designed and developed MovieStar, an app that allows users to save their favorite movies with details such as title, year released, poster image, and personal movie ratings.
- Implemented a user-friendly interface with features for adding, editing, and deleting movie entries.
- Utilized MongoDB for efficient data storage and retrieval.

Client List Management System   **July 2023**
Web-Based System | JavaScript, Node.js, Express.js, MongoDB
- Developed a web-based system for managing client information efficiently.
- Utilized API integration to fetch and display client data from external sources.
- Implemented robust data validation and error handling to ensure data accuracy.

Professional Experience

Freelance Web Developer   **May 2020 - Present | 3 yrs 9 mos**
